

Award for Kidney transplant related work done at JIPMER

The paper entitled **“Left sided laparoscopic donor nephrectomy: Step by Step video description of technique”** was presented by

Dr Muruganandham K, Assistant Professor of Urology at recently held TAPASUCON-2013 conference at Trichy. In this video paper various technical points which are necessary to avoid complications during LDN were highlighted. The paper was awarded as “Best paper” in the video category.

Laparoscopic donor nephrectomy (LDN) is an advanced laparoscopic procedure which offers several advantages to voluntary kidney donor in the form of; less blood loss, less post-operative pain and early recovery. Kidney transplantation unit at JIPMER recently started the LDN program and regularly performing left sided LDN procedures. This is a good step forward to our kidney transplantation program.
